

Adobe Photoshop CS5 Introduction

Course length

1 day

Why come on this course?

On this course you will learn how to use the various elements in the Photoshop CS5 interface so as to efficiently work with the software. You will use the different tools in Photoshop for selecting parts of images and identify the need for having layers in a Photoshop document. You will also organise the different components of the design as layers. With a layered Photoshop document created, you will then apply layer effects and other special effects in order to enhance the appearance of the design. Once the design is finalised, you will save images in both print and web formats.

Who is it for?

This course is intended for a diverse audience including, but not limited to, computer-savvy professionals who want to create and enhance graphics for marketing materials, newsletters, blogs, and websites; photographers who want to work with and prepare photos for print or web; students with an interest in graphic design or those with novice design skills; and professionals who want to learn and use Photoshop CS5 as a complement to other CS5 programs. You should know the basics of using Windows.
